Announcing our MWC Vegas Demo with Airspan Networks!

This month we officially announced our upcoming in-person demo with Airspan at next week's MWC Vegas 2024!

If you'll be at MWC and would like to see the demo, just reply to this email and we will schedule a time that is convenient for you.

6GSymposium

Our fearless COO & Co-Founder Tyrell Junius joined a panel this month at the 6GSymposium titled "Building Business Models and Demand Ahead of Full 6G".

He shared how we're laying down the road in the Integrated Sensing and Communications Space by offering ISAC functionality today, and how the work we're doing now will be integral to the 6G networks of tomorrow!

Altera Innovators Day

It was our pleasure to participate in Altera Innovators Day 2024 and share our session "See with 5G: Personnel Detection and Location".

It was a blast to give our perspective on how we use Altera Agilex FPGAs to empower our PolyEdge Multifunction Sensor to offer industry-leading ISAC solutions.

Thunderstorm 24-3

Let's just say it was a busy travel month... our Senior Wireless System Engineer Oscar went to Texas for Thunderstorm 24-3, an invitation-only field technology showcase put on by the DoD and other US interagency partners.

In real-world conditions we shared how PolyEdge can help shape the future of ISAC capabilities.

New Contracts

It's our pleasure to announce this month that we have received two major new contracts.

The US Air Force awarded us a \$1.2 million contract to build and demonstrate a drone detection and tracking system using our 5G-based radar sensing technology.

Additionally, we have been awarded an Other Transaction Authority contract from USSOCOM. Our mission is to develop and showcase 5G devices with reduced electromagnetic signatures, a pivotal advancement for implementing 5G technology in challenging tactical environments.

We'll use these engagements to continue driving our vision of FutureG wireless - multifunctional, resilient, and AI-native.

Khasm Labs / 5G Open Innovation Lab

We're pleased to announce that we've been accepted into the prestigious 5G Open Innovation Lab (part of Khasm Labs) innovation ecosystem!

As one of the 11 startups selected, we are honored to join this industry-leading community that fosters cutting-edge innovation and collaboration. This opportunity will allow us to accelerate our work in ISAC in the 5G space.

New Blog Post: hubraum Wi-Fi Sensing Program Recap

New Blog Post Alert!! We leveraged our time in hubraum's Wi-Fi Sensing Program this year to unlock new potential for our PolyEdge Multifunction Sensor in the smart home space. By integrating Wi-Fi sensing and the Matter IoT standard, we've redefined smart home capabilities, offering a seamless, interoperable solution.
