

Tiami Networks September & October 2025 Newsletter

New Website & Logo

Growth deserves a fresh face. This fall, Tiami Networks unveiled its new website and logo, marking a major step in our evolution from early-stage disruptor to established leader in Integrated Sensing and Communications. The new look reflects who we've become — bold, confident, and focused on bringing ISAC technology from research to real-world deployment.

NVIDIA GTC DC

Our Co-Founder and COO Tyrell Junius represented Tiami at NVIDIA GTC DC, joining the nation's top innovators in AI and networking. From edge inference to next-gen radar sensing, Ty shared how Tiami's fusion of AI and ISAC is helping redefine what intelligent connectivity looks like in practice - across telecom, defense, and critical infrastructure.

MENA's First Live ISAC Demonstration with e&

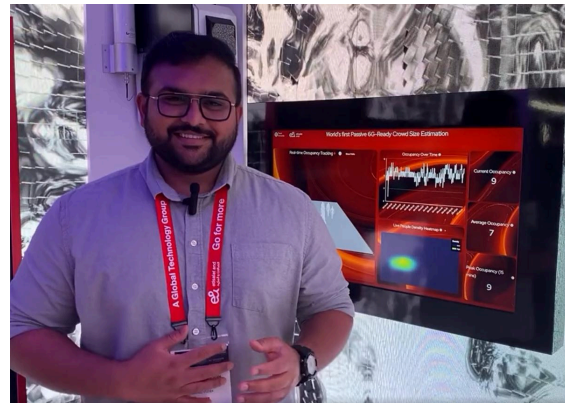

At GITEX Global in Dubai, Tiami made history with MENA's first live demonstration of Integrated Sensing and Communications in collaboration with e&. The demo used the PolyEdge Multifunction Sensor to show how standard 5G infrastructure can sense motion, occupancy, and activity - without cameras, without extra hardware, and in real time.

Building Momentum at GITEX Global

Our partnership with e& continues to grow. Tiami was featured inside the e& booth at GITEX Global, where Akhash from our team showcased how PolyEdge's AI-driven sensing transforms smart buildings and urban spaces. From energy efficiency to enhanced safety, our collaboration is setting the stage for region-wide deployments.

Drone Defense at AUSA 2025

In Washington, D.C., Tyrell joined thousands of defense professionals at the AUSA Annual Meeting, highlighting Tiami's drone detection and tracking solutions built on ISAC technology. As part of the Innovators' Corner, Tiami shared how PolyEdge can passively detect and classify unmanned aircraft - a critical capability for modern defense and homeland security operations.

IEEE MILCOM: From Research to Real Deployment

At IEEE MILCOM 2025, our CEO Amitav Mukherjee joined a technical panel on Integrated Sensing and Communications, while our booth gave attendees a firsthand look at how PolyEdge brings those concepts to life. From signal fusion to 5G-native sensing, we're bridging the gap between academic vision and field-ready systems.

Mission-Ready with SEMPRE at Talisman Sabre 2025

At this year's Talisman Sabre exercise in Australia, Tiami joined forces with SEMPRE to demonstrate how ISAC and resilient communications can enhance mission awareness in contested environments. The joint deployment showed what happens when sensing meets security at the tactical edge - real-time awareness, no compromise.

Ongoing Collaboration with the U.S. Air Force

Wrapping up the season, Tiami participated in the National Security Capital Summit, strengthening our partnership with the U.S. Air Force and the broader defense ecosystem. From low-altitude drone detection to resilient SATCOM research, Tiami's work continues to align with the Air Force's mission to modernize sensing and communications for tomorrow's battlespace.

Upcoming Events

Come join us at one of the many upcoming events we'll be at! If you're interested in learning more or setting up a time to connect just reply to this email and we'll take care of you.

Show	Dates	Location
MWC Doha	Nov 25-26	Doha, Qatar
CES	Jan 6-9, 2026	Las Vegas, USA
MWC Barcelona	Mar 2-5, 2026	Barcelona, Spain

Tiami Networks | 801 K Street Suite 900 | Sacramento, CA 95814 US
